569+ GitHub Contributions (Last Year) | Nationality: Pakistani | Availability: Immediate | Open to Relocation

PROFESSIONAL SUMMARY

Results-driven Full Stack Developer and Software Engineer with 3+ years of hands-on experience designing, developing, and deploying scalable web applications across healthcare, storage, and enterprise sectors. Strong proficiency in JavaScript, TypeScript, React.js, Node.js, Express.js, and Next.js with a proven track record of building robust RESTful APIs, real-time platforms, and pixel-perfect responsive interfaces. Adept at delivering high-impact solutions in Agile environments with a strong focus on clean code, performance, and user experience. Immediately available and open to relocation.

TECHNICAL SKILLS

Languages: JavaScript (ES6+), TypeScript, Python, Bash/Shell Scripting

Frontend: React.js, Next.js, Vue.js, Redux Toolkit, Tailwind CSS, HTML5, CSS3, Material UI

Backend: Node.js, Express.js, REST APIs, GraphQL, WebSocket, JWT Authentication, RBAC

Databases: MongoDB, MySQL, PostgreSQL, SQLite, Stored Procedures, Database Design and Optimization

DevOps and Cloud: Docker, Docker Compose, GitHub Actions (CI/CD), AWS (EC2, S3), Vercel, Linux/Ubuntu Server

Testing: Jest, React Testing Library, Manual and Automated Testing, Postman

Tools: Git, GitHub, Agile/Scrum, Figma, Cloudinary, VS Code, Foreman, ESLint, Prettier

WORK EXPERIENCE

Full Stack Developer

Apr 2025 to Present

Ash Cloud Company

- Architect and develop scalable web applications using React.js, Node.js, and Express.js, improving system reliability and reducing API response times by 30%.
- Design and implement optimized RESTful APIs and MongoDB schemas supporting high-traffic production workloads.
- Lead UI enhancements and enforce responsive design standards, achieving consistent cross-device compatibility across all delivered features.
- Collaborate in Agile sprints with cross-functional teams, delivering production-quality features on schedule with zero critical post-release bugs.

MERN Stack Developer

Sep 2024 to Mar 2025

BrightCodeLab

- Delivered end-to-end web applications using the full MERN stack with scalable MongoDB schemas and TypeScript integration.
- Built reusable React component libraries and integrated third-party APIs, accelerating feature delivery by 25% across multiple client projects.
- Collaborated with UI/UX designers to convert Figma designs into pixel-perfect, fully responsive interfaces achieving 100% design accuracy.
- Participated in code reviews and Agile ceremonies, maintaining high code quality standards across the team.

Frontend Developer

Dec 2023 to Aug 2024

Twenty Four Storage Company | Storage and Logistics

- Built and maintained frontend web applications using React.js, JavaScript, and Tailwind CSS for a storage management platform.
- Integrated RESTful APIs and implemented responsive UI components, improving system usability and reducing user-reported issues by 40%.
- Collaborated with backend developers to ensure seamless data flow and optimal application performance across all modules.

Frontend Developer Intern

Apr 2023 to Nov 2023

Tech Pioneer | Software Development

- Developed reusable React.js component libraries during a structured 8-month program, with components integrated directly into the production codebase.
- Contributed to UI/UX improvements and participated in full Agile sprint cycles from design through deployment and post-launch iteration.

KEY PROJECTS

Sehatkor - Healthcare Platform | <https://sehatkor.pk>

[TypeScript](#) | [MERN Stack](#) | [WebSocket](#) | [Cloudinary](#) | [Redux Toolkit](#) | [Node.js](#)

- Engineered a full-scale production healthcare platform connecting patients with doctors, hospitals, labs, and pharmacies in real time with zero runtime crashes since launch.
- Integrated WebSocket-based live chat and a complete appointment booking system with JWT-secured authentication and role-based access control.
- Designed a scalable RESTful backend architecture supporting a rapidly growing medical service ecosystem, managing media assets via Cloudinary and global state via Redux Toolkit.

KCD Notify - Administration Web Application

[MERN Stack](#) | [Node.js](#) | [Email API](#) | [WhatsApp API](#) | [React.js](#)

- Developed an administration web application for Khyber College of Dentistry, reducing result distribution time from days to seconds for 1,000+ students and staff.
- Implemented automated Email and WhatsApp broadcast system with an intuitive RBAC admin dashboard for efficient institutional communication.

Medicore PMS - Desktop Pharmacy Management System

[Electron.js](#) | [React.js \(TypeScript\)](#) | [Node.js](#) | [PostgreSQL](#) | [SQLite](#)

- Architected a fully offline-capable desktop PMS using Electron.js and TypeScript, currently live across 13 pharmacies with real-time POS billing supporting Retail and Wholesale transactions.
- Built automated daily reporting for sales, purchases, stock movement, and inventory levels with a subscription-based licensing system enabling scalable multi-pharmacy deployments.

EDUCATION

BS Software Engineering | Islamia College University, Peshawar

2020 to 2024

CERTIFICATIONS AND ACHIEVEMENTS

- AWS Cloud Practitioner Essentials - Amazon Web Services (AWS Training and Certification)
- Docker and Kubernetes Fundamentals - KodeKloud
- GitHub Actions - CI/CD Pipelines - LinkedIn Learning
- Programming with JavaScript - Meta (Coursera)
- Basics and Advanced React - Meta (Coursera)
- 569+ GitHub contributions in the last year - consistent open-source activity and engineering discipline
